

Emergency Care Protocol for COVID-19

How We're Implementing Recommended Center for Disease Control & Prevention (CDC) Guidelines at the Clubs

Reducing Germs

- Health Screenings for all staff and children entering the building
- The Club is not hosting visitors or volunteers
- Parents not allowed past the screening zones
- Established 6ft clear zone between screening point & program spaces
- Ongoing cleaning and disinfection throughout the day and deep cleaning every night

Handwashing

- During transitions
- Before meals
- Trips to the restroom
- As often as possible!

Social Distancing Measures

- Serving children in our largest facilities and limited number of participants
- Once children have been screened they are to remain on the other side of the clear zone until pick up
- Children leaving the building with staff for outdoor activities will exit and re-enter through an alternate door.

Program Planning

- Social distancing measures to limit close contact, such as choosing activities that minimize close contact and allow for more physical space between children.
- Teach children about personal space
- Setup more tables and remove chairs to create space
- Utilize open Club areas for programs instead of smaller program areas and limiting number of children in smaller program spaces
- Utilize every other computer station
- Select activities that do not require close contact between children
- Providing outdoor activities

**** Children or staff who become ill during the day will be sent home and will not be able to return until 72 hrs after their fever has gone***
